

BULLETIN

11th international practice firm trade fair

8th March 2017
Celje - Slovenia

The 11th international practice firm trade fair took place on 8th of March. This date also marks a hundred -year- anniversary of international women day. There are more and more women participating in business world. It is known that in the last years, soft skills and creative way of thinking are the key to success. Soft skills is the field where women are better than men. Open communication, empathy, setting and motivating of work issues with clear goals and strategies which lead to stability, growth and development are of vital importance.

26 foreign practice firms and 31 domestic ones exhibited their products and services at the fair this year. Exhibitors surprised us with their inventions and creativity, which was confirmed by the jury. It was a difficult task to choose the best ones.

Different kind of presentations took place on the stage. On the first floor individual bussiness meetings were held and a lot of contracts were signed. The vision of Slovene Central office and economic schools is to educate young generation for domestic and foreign labour market . We endeavour to keep in touch with real economy. Employers are the main stimulators for implementation of topic subjects into school programmes. It is much easier for the youth with all the skills and experiences they get at the fair to find a job.

It was a wonderful day, a day filled with positive energy.

Mateja Kapitler,
Head of Slovene Cental office
